Cultivation

Forecast

Forecasting can be a critical part of your business. With proper forecasting you can take advantage of just-in-time inventory management which will ensure your raw materials will show up just at the right time saving you time and money.

Plan

Plan to work and then work that plan. Deciding on your product line and executing on its production is what it is all about. From soil to oil or edible to medible you have to plan and continuously fine-tune your processes.

Track

Track and trace everything and have it link to your compliance monitor. Every piece of inventory and product movement has a chain of custody and full audit trail.

Register

Nixla allows you to plan and track all greenhouse activities so you know exactly what is growing where, what needs to be moved, how long it needs to grow and what your expected yield will be.

Track plants across all stages of the cultivation and harvest processes to increase yields and efficiencies.

Tracable Growing Stages

- Plant Clones Or Seeds
- Propagation
- Pre-Vagitative
- Vegetation
- Flowering
- Harvest
- Wet Harvest
- Dry Harvest
- Trimming
- Close Harvest

Cannabis Growing Software for Producers

■ Grow Traceability

The robust Product Data Management capabilities of Nixla cannabis cultivation software allows you to keep track of your live inventory, so you can trace every seed mother and clone through each growth phase.

■ Capture Lab Results

Attributes of lab tests like THC content and CBD can be automatically captured, either by scanning directly to Nixla's cannabis cultivation software or through API integration between Nixla and your lab.

■ Track Nutrients and Energy

Applications of nutrients and consumption of energy can be traced in Nixla's cannabis cultivation software as your plants grow. Any interaction of your staff with your plants can be recorded and associated to a plant, room, location or other grouping.

■ Make Projections

Leverage the power of your historical data that's captured on a strain-by-strain basis and utilized in reports. Make easier, more informed yield and potency projections.

■ Follow Plant Movements

Material Management capabilities in Nixla's cannabis cultivation software allows you to easily track your plants as they are moved between rooms for the different phases of growth.

■ Relieve Compliance Headaches

Nixla's automation seamlessly keeps you in compliance with the cannabis industry's traceability and regulatory requirements.

Manufacturing

Processing

Nixla offers a robust ERP solution with full manufacturing, inventory and financial integration, developed as a Complete system from beginning sales order entry through the manufacturing and accounting process. Nixla incorporates the critical needs of batch processing manufacturers, which includes lot control, compliance and management of complex formulas and recipes. Discover how we meet the unique needs of your industry.

After cultivation and harvest you need to be able to manage the entire extraction process in order to produce the right end-result and record the required state metrics at each step. Regardless of whether you are producing extracts, edibles, dried products or something else, our software enables you to set up your processes and automatically calculate the cost of each process as well as the quantity of product made.

Whatever you are manufacturing or extracting, Nixla Cannabis can track and streamline the process. Configure routes and recipes to precisely calculate requirements and costs at each stage.

Ensure quality using built in Quality Assurance to automate laboratory testing and quality checks at any required stage in your processes, regardless of whether it is for your own extraction or on receiving products from your vendors.

Manage each stage of your manufacturing process from extraction and refinement to finished product.

Extraction Process Stages

- Extraction
- Pre-Run
- Primary Extraction
- Refinement
- Primary Packaging

Cannabis Growing Software for Producers

■ Capture Extraction, Lab and Waste Data

Streamline the tracing of data in the oil extraction process, including batches, test results and destroyed waste. Capture lab results directly into Nixla's system.

■ Speed Up Packaging & Fulfillment

Reduce the effort of meeting varied labeling and packaging requirements of all the states where your products are sold. Plan and consolidate your cannabis product orders for delivering to retail outlets. Automatically flow customer and order data to pick tickets, packing slips and billing.

■ Streamline Infused Product Manufacturing

Automate manufacturing activities involved in preparing edibles and other cannabis-infused products. Track inventory, costs, approvals and processing steps, and manage multiple versions of recipes with their associated state requirements, instructions and labeling information.

■ Forecast Demand

Leverage Nixla's demand planning tools to forecast customer orders, better manage your supply chain, and anticipate costs. Utilize historical data to identify trends and adjust for seasonal factors.

■ Capture Lab Results

Attributes of lab tests like THC content and CBD can be automatically captured, either by scanning directly to Nixla's cultivation software or through API integration between Nixla and your lab.

■ Reduce Compliance Efforts to Minutes

Nixla's automation seamlessly keeps you in compliance with the cannabis industry's traceability and regulatory requirements.

Distribution

A complete solution that enables cannabis product wholesalers and resellers to expedite large volume orders. Manage your vendor, facilities, and wholesaler partners from one platform

Get Freedom in the Cloud with Nixla

Nixla delivers a complete software solution for the Cannabis Distributor. It simplifies order processing and picking, creating efficiencies for everyone from low volume distributors to high volume distributors. As cannabis wholesalers and resellers, each has unique challenges and Nixla is flexible enough to handle these challenges and grow with you as your business grows.

As a cannabis distributor, being able to accelerate higher volume customer orders from your warehouse and distribution center is a key to happy customers, growing sales and the success of your business. Nixla platform, providing the flexibility and scalability you need to automate and simplify your business. Nixla industry best practices approach brings the expertise and proven systems required to streamlining your work flows, increase your financial visibility and provide real-time forecasting and analytics all while delivering the traceability and reporting you need to stay compliant.

Nixla Cannabis Distribution Solutions

- **Large Scale Order Processing**

Nixla's robust platform supports your need for processing high volume orders, while maintaining accurate customer data and up-to-the-minute inventory and delivery information.

- **Cannabis Product and Inventory Management**

Effectively manage a wide range of products in multiple warehouses and locations. Nixla has extensive product data fields. Use Batch and Lot tracking and easily trace product movements.

- **Supply Chain Management**

Manage all your supply chain processes efficiently. Use replenishment rules, stock levels and seasonal stock adjustments in your procurement workflows. Keep track of vendors, prices and pricing history.

- **Demand Forecasting**

Leverage Nixla's demand planning tools to forecast customer orders and anticipate costs. Utilize historical data to identify trends and adjust for seasonal and event factors.

- **Fast Order Fulfillment**

Automate your order fulfillment processes with Nixla by using bins, zones and locators. Fill orders using Zone or Wave planning, consolidate customer deliveries, and print labels, shipping confirmations and invoices with no data re-entry.

- **Compliance and Reporting**

Meet every state requirement for cannabis traceability. Built-in reports make fulfilling your compliance requirements a breeze.

Dispensary

Optimize profits, reduce time-consuming processes and mitigate risk in your dispensary with Nixla's Dispensary and Point of Sale solution.

Automated Discounts and Loyalty Programs

Setup discounts based on date, time, product, brand and more, plus employee weigh heavy and daily discount allowances. Reward the loyal customers with our exclusive loyalty points program or reward them with certain products/promotions.

Purchase Limits

Compliance can be stressful which is why we make sure you never over dispense to a patient or customer. The system tracks limits based on type and equivalency.

Online Ordering, Menu Displays

Fully integrated online ordering portal, digital menu displays and more, are now available through our dedicated integration partners.

Data Driven CRM

Customer Relationship Management (CRM) tools to reward loyal customers and referrals. Setup targeted email and text campaigns based on customer's favorite products, last visit date, purchase history, birthdays and more.

Customer Profiles

Create individual customer profiles to help treat all of your customers like regulars. Keep track of special preferences, medical preferences, purchase history, rewards points and more.

Nixla Cannabis Dispensary Solutions

■ Easy-to-Use Interface

An intuitive, simple interface design makes Nixla's dispensary POS easy for employees to begin using right away.

■ Accurate Traceability

Nixla is a complete seed-to-sale system that traces every detail of your business, from highly detailed product information to inventory, vendors, customers, orders, prices and more.

■ Demand Forecasting

Use historical data and trends to forecast demand. Automation in Nixla dispensary software also allows you to set thresholds for reordering so that popular items stay in stock.

■ Hardware Compatible

The Nixla dispensary POS system is compatible with a wide range of hardware, including cash drawers, receipt and label printers, barcode scanners, scales, touch screens and more.

■ Interactive Dashboards

Nixla's cannabis dispensary software gives you real-time insight into the status of your business for improved and quicker decision-making. Drill down from high level views and examine the detail.

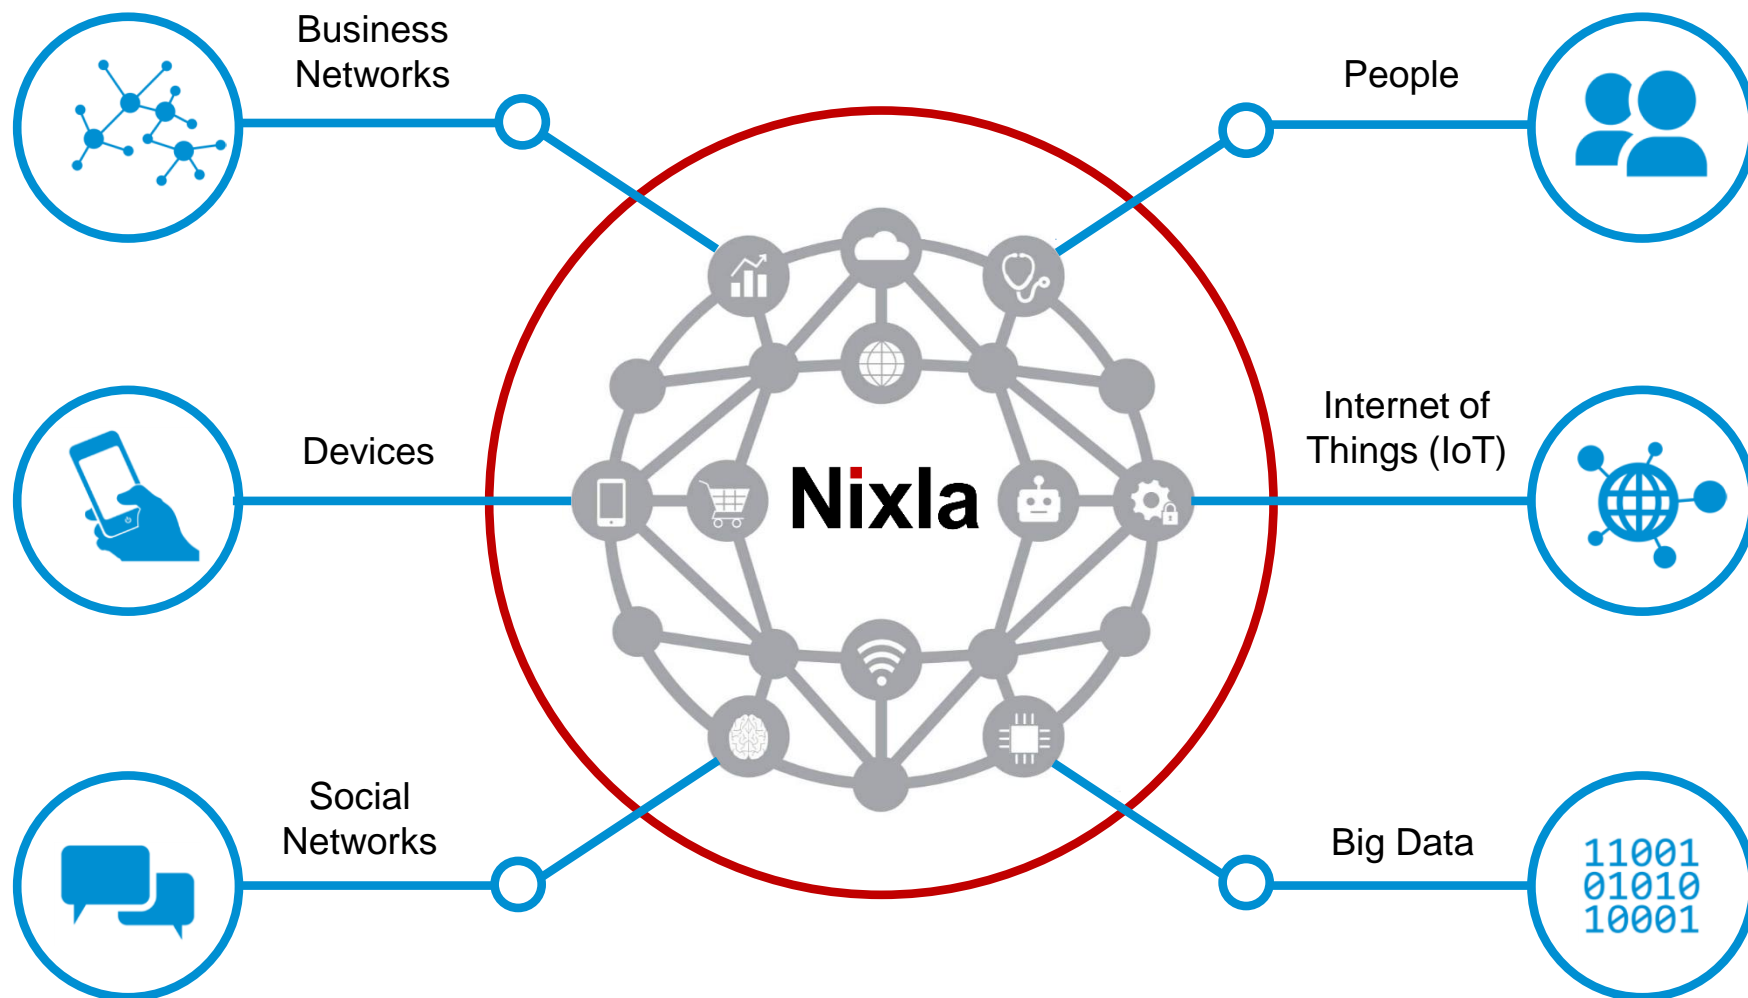

■ Powerful Inventory Management

Get insight into your inventory, improve accuracy and reduce your labor costs with Nixla's powerful inventory management. Nixla keeps track of every product going into and out of your business, while helping you avoid product overstocks and outages.
